

# MUSIC THEORY

## ABOUT ME

**Hello there! This is Aman Atman Sahu and here I am to introduce you to my new website which is about Music Theory. There are many people around the globe who are really in a problem of Music Theory where people just go round and round So, I thought of making a website and help people around the globe. And this website will be user friendly anybody of any age can easily operate it.**

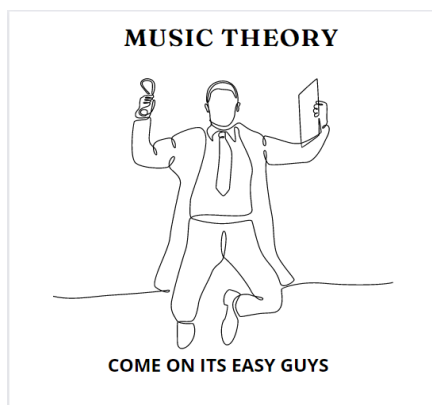

### 1. INTRODUCTION

**Music theory** is the study of the practices and possibilities of [music](#). *The Oxford Companion to Music* describes three interrelated uses of the term "music theory". The first is the "[rudiments](#)", that are needed to understand music notation (key signatures, time signatures, and rhythmic notation); the second is learning scholars' views on music from antiquity to the present; the third is a sub-topic of [musicology](#) that "seeks to define processes and general principles in music". The musicological approach to theory differs from music analysis "in that it takes as its starting-point not the individual work or performance but the fundamental materials from which it is built.

### 2. DESIGN

The first thing that catches the eye is always the design of the website. The design of this website is very astonishing and is very eye pleasing. The website is very minimal without any adds whatsoever and the colours used are very punchy and vibrant.

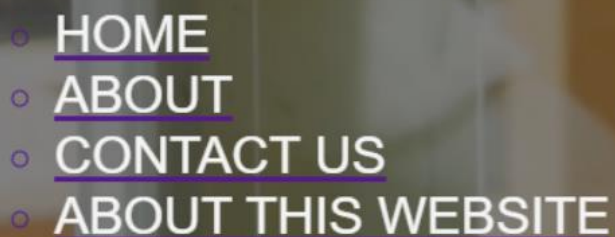

**P.S. The Logo of the website is also beautiful**

[THE INTERFACE LOOKS LIKE THIS](#)
